CUPPING WITH MASSAGE

Cupping is based on the common practice of Chinese cupping therapy, and the incredible results that this simple treatment produces have truly impressed those who experience its subtle power. By creating suction and negative pressure, Massage Cupping therapy is used to soften tight muscles and tone attachments, loosen adhesions and lift connective tissue, bring hydration and blood flow to body tissues, and drain excess fluids and toxins by opening lymphatic pathways.

HOT STONE MASSAGE

A specialty massage where the therapist holds smooth, heated stones in the palm of their hand to perform the massage. The heat from the stones can be very comforting and deeply relaxing -- you will feel your stress melt away. Hot stone massage also aids in warming up tight muscles. Because the muscles are relaxed from the heat, the therapist can work the muscles using a lighter pressure, but still access deeper muscle layers.
